

September 12, 2022

I recently asked Wade Norris Logging to visit my farm as I was considering having them do a select cut on my 140 acres.

Wade Norris came on time and we toured the farm. We discussed my plans for the farm which was to sell it in a few years. He was very thorough in the review of the property and very knowledgeable of the various species of trees. At the end of our tour he gave his recommendation. He recommended not to do the harvesting at this time. His recommendation was that it would not produce the income that would offset the beauty of the farm which could affect a future selling price.

Mr. Norris is in the logging business. He passed on the opportunity to make a short term profit so that I could receive a long term benefit. His integrity and professionalism was more important than a quick profit. The interests of a customer was his top priority.

I appreciate his opinion and integrity. I highly recommend this company for any logging on your property because your interests will be the priority.
